

Mobility, increased use of social networking, regulatory pressures to address risk, and laws on data security and reporting in the U.S. and globally have heightened the awareness and importance of data privacy. Data privacy, in turn, is an essential aspect of data access and is addressed by these Terms of Use. These Terms of Use must be agreed to both by NYU participants and by non-NYU participants, even though access to the NYU APIs provided for this event (the New York University HackNYU global hackathon held February 15, 2019 – February 17, 2019) will be available only to NYU participants, i.e., those with an NYU NetID.

By accepting these Terms of Use, you affirm that you understand that you have been granted access to APIs for purposes of this hackathon and that you should not share information, not share the APIs, and not publish the data. When you use the data in analysis and application development during the Hackathon, you should safeguard the privacy of the sensitive information so as to comply with applicable laws and with ethical obligations, including New York University's Policy on Responsible Use of NYU Computers and Data (<https://www.nyu.edu/about/policies-guidelines-compliance/policies-and-guidelines/responsible-use-of-nyu-computers-and-data-policy-on.html>) and the University Student Code of Conduct.

All the data is owned by NYU and should be used for the HackNYU global hackathon only. Any additional use of the data beyond the hackathon projects, at any other time or for any other reason, is not permitted without prior approval from NYU Information Technology. By clicking the checkbox below, you agree you understand and accept your responsibilities under these Terms of Use.
